FIXED INCOME TRADING SOLUTIONS

X_TRADER® gives professional traders the ability to view and trade interest rate products with its powerful suite of trading tools. Trade futures, options, and swaps on major derivatives exchanges around the globe as well as U.S. Treasury securities on multiple venues.

Cross-border futures spread: Spread international fixed income contracts against each other in terms of yield.

THINK, SEE AND TRADE IN YIELD

Trading Technologies' Yield by TT functionality allows user to view fixed income instruments in both price and yield. Autospreader® users can easily value and manage complex fixed income spread trades in terms of yield. The solution uniquely combines world-class analytics with high-performance server-side execution, allowing users to think, see and trade in yield.

VIEW AND TRADE AGGREGATED MARKETS

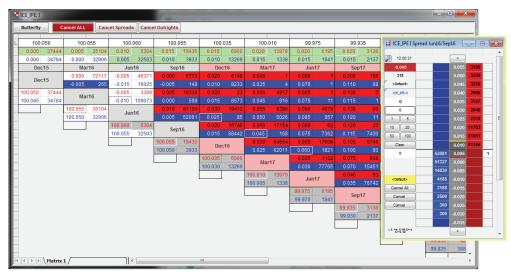

The server-side Aggregator tool for X_TRADER combines multiple liquidity pools of an asset, making it possible for users to easily view the aggregated market of similar instruments listed across multiple venues and route orders from the aggregated view based on predefined order-routing rules and configurations. Trade an aggregated market on its own or as a leg of a synthetic spread with Autospreader.
