

TT[®] OMS

The most advanced technology delivering a more cost-effective order management system for FCMs and brokers

INTEGRATED

Order management seamlessly integrated with best-of-breed execution, all delivered with no long-term financial commitment via the software-as-a-service (SaaS) model.

OPEN PLATFORM

Accepts order flow from any EMS, OMS or algo provider via FIX and routes out to a multitude of collocated exchanges, private liquidity pools, bank networks or third-party systems.

ORDER MANAGEMENT

High-touch workflows provide brokers complete flexibility across multiple execution desks to accept, manage and execute orders as they see fit and to conduct post-trade confirmations and allocations.

REPORTING

Data storage and access facilitate queries, analysis and customer reporting as well as regulatory reporting and other compliance needs.

KEY FEATURES

FIX Services

Easily integrate FIX clients, OMS/EMS platforms, and middle and back office systems.

Global Order Book

Control the visibility of customer orders and pass ownership to another user, group or desk.

Care Orders

Claim and execute staged orders with a variety of advanced care order functionality, including stitching, splitting and bulking.

Execution Tools

Leverage ADL[®], Autospreader[®], TT Order Types, broker algos and third-party algos for superior execution on dozens of collocated exchanges worldwide.

Symbology

Out-of-the-box symbology simplifies integration, or use our simple mapping tool.

FIX Routing

Route orders via TT FIX Gateway to any number of destinations, including bank networks, private liquidity pools and third-party systems.

Allocations

Provide pre-trade allocation instructions or leverage a variety of post-trade methodologies.

Reporting

Provide customers with summary and/or detailed order and fill activity in various formats with robust, in-app reporting tools or via direct database access.

TT OMS – SEAMLESSLY INTEGRATED ON THE TT PLATFORM
